A Non-Lead Solution

Steel QuikStik® Roll

200624STR

The Steel QuikStik® on a roll is designed to have lower environmental impact than the customary lead wheel weights. This product consists of a unique trapezoid design and a high density material available in an easy-to-use, with no measuring, no cutting and no waste. Steel QuikStik® is provided as a roll, designed pre-segmented to meet your precision wheel balancing requirements and attached QuikTab® feature for easy-to-peel protective backing.
