

PERFECT STEEL™

Adhesive Wheel Balance Weights

Quality Steel For The Aftermarket

As the leading OEM supplier and manufacturer for wheel weights in North America, Perfect Equipment is known for original equipment designs with the highest product quality and durability in the industry. As the tire and service industry increasingly demands more value oriented products, Perfect Equipment is able to bring its high expertise in design and a worldwide manufacturing platform to the for front and deliver quality products that are especially optimized for aftermarket use. You have a choice when it comes to the products you use. Choose Perfect Equipment.

Part Number:	200576FE
Segment Weight:	.25 oz
Strip Weight:	3.00 oz
Strip Width:	.75"
Strip Length:	6.5"
Strip Height:	Low Profile
Box Quantity:	48 qty
Box Size:	7" x 3.5" x 2.5"

Coated Protection

Unlike many steel weights in the aftermarket, PERFECT STEEL segments are completely powder-coated with a quality coating that is optimized for aftermarket conditions.

Low Profile Design

The PERFECT STEEL adhesive features a low profile design - only 3/16" height and a 3/4" width. This allows it to fit to nearly any rim, even those with tight clearances.

Adhesive Power

Features a quality adhesive tape that provides high initial tack for fast balancing, regardless of the outside temperature.

Durable Results

The PERFECT STEEL line is made specifically with the aftermarket in mind and will provide customers with durable results.

Non-Lead Material

The entire PERFECT STEEL line-up of products is a perfect non-lead solution for your wheel balance weights and your business.
